

Tailored for the Site

- Option (C)** Water-cooled condenser
- Option (I)** Modifications for high ambient conditions
- Option (J)** Modifications for low ambient conditions

Tailored for the Application

- Option (R)** Alternate water pump
- Option (D)** Two separate pumping systems
- Option (Y)** Single pump system with multiple water circuits
Includes flow meters and metering valves
- Option (G)** Manual hot gas bypass system for tight temperature stability
- Option (H)** Electronically controlled hot gas byapss system for tight temperature stability ($\pm 0.1^{\circ}\text{C}$). **For R-Series only.**
- Option (H)** Electronic building water control valve for tight temperature stability. **For WW-Series only.**

Application Protection

- Option (B)** High supply water temp thermostat
- Option (N)** High supply water temp thermostat and alarm
- Option (S)** Flow switch
- Option (L)** Supply water particulate filter

Convenience Options

- Option (A)** Flow meter
- Option (M)** Time clock to automatically turn off unit
- Option (O)** Hand shut-off valves
- Option (P)** Locking casters

Options for Custom Needs

- Option (K)** Designates any other custom feature you want built into the Haskris unit
